Sokolovská 79
186 00, Praha 8 - Czech Republic

06 February 2009

Dear Mrs Ondercova,

This letter is to inform you that the Location Table for Czech Republic:

Country code	2
Location table number	25
Version	3.0

that you submitted on 11th December 2008 for verification and certification, has passed the compliance test, which is based on the test requirements described in the latest version of the document "TMC location table test requirements" of the TMC Forum. This means that the table is (as a minimum) largely compliant with the current version of the standard, ISO 14819 part 3 - Location Referencing Rules, and the latest version of the Location Coding Handbook of the TMC Forum, and is considered to be satisfactory for use in TMC applications. Your table has obtained Certificate number 2009-02-CZ and will be included in the register of certified location tables kept by TISA, and available at the TMC Forum / TISA web site.

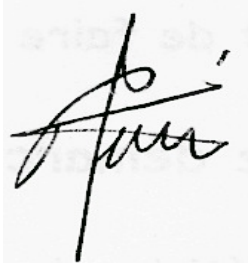

Verification of this location table has been duly carried out according to the latest version of the Location Table Certification Procedure of the TMC Forum. This means that the location table is checked for an established set of test requirements that can be checked in a semi-automated or automated way but it does not confer any guarantee that the table is free of errors.

The team would like to highlight some comments which have to be implemented for the next version:

- Replace the current discussed Interrupt Road uses with correct coding using the Link Roads mechanism, e.g. location 14806, 13736, 14869 and 14804, without re-using these location codes
- Remove the reference for empty names and remove the record for the empty name from the NAMES table
- Remove the extra columns (SNATDESC_2ND_CASE and SNATDESC_7TH_CASE) from the SUBTYPES table
- ensure that any resubmissions have an incremented version number.

TISA is not liable for any incidental, special or consequential damages arising from the use of or inability to use this certified location table, whether in transmission, reception equipment, data products or otherwise.

Signed on behalf of the Traveller Information Services Association Steering Board,

A handwritten signature in black ink, appearing to read 'Michel Rénéric', is written over a light grey rectangular background.
